

Tilt & Turn Hardware Specifications

A. Standard Features

Hinges

Concealed double action hinging system, Tilt before turn mode for added safety.
Multi-Point locking system around perimeter of sash.

Handle

Single handle locking
Non-locking for fire escape only
Initial opening restrictor incorporated into hardware.

Gasket

Full compression seal using twin gaskets.

Glazing

Fully drained and vented glazing system featuring 28mm DGU and Vortex decompression chamber around sash.

Sash Lift & Safety Mishandling Device

Sash lift assists closing and centralises sash in closed position. Safety mishandling device prevents handle operation from tilt to turn for added safety.

B. Optional Features (can be installed at extra cost by specification)

Ventilators

Quality aluminium vents can be fitted through the head of all frames
