

HELIX™ Tilt and Slide

The Tilt and Slide Vertical Slider window is part of our HELIX™ Range, and provides a modern replacement for the traditional sliding sash style of window with the added benefit of inward opening sashes giving improved access for cleaning.

The Tilt and Slide Window is manufactured in engineered pine for maximum stability and durability and uses the Caldwell Spiral Balance system with the Easy Clean Tilt facility, which allows the sashes to be tilted inwards for cleaning. The Tilt & Slide is also available as Secured by Design and has been certified to an Extreme Weather Rating by the BRE, incorporating Blairs' patent pending "DwellZone Technology™", making this window the best in its class.
