

VORTEX™ Tilt and Turn

The VORTEX™ Tilt and Turn Window offers modern European design, providing inward opening access which allows easy cleaning at height. This window is manufactured in engineered pine and comes with Secured by Design as standard. It also features a deep sash which increases energy efficiency. Independently tested to the very highest levels, this window employs VORTEX™ technology to ensure that the weather stays out and the heat stays in.

In all a versatile design and cost efficient solution to many modern building challenges. The VORTEX™ can be configured with multi-openings and fixed lights, enhancing the flexibility of this window.
