

## VORTEX™ Single Door

The VORTEX™ inward opening single doorset is manufactured in engineered pine as standard, giving knot-free facings and superior structural stability. It comes Secured by Design as Standard and is suited to match the VORTEX™ Tilt and Turn window.

The VORTEX™ door has been tested to the very highest standards of security and weather resistance, achieving the highest possible wind and water ratings, so that our customers can have complete confidence when specifying this product. In addition, the VORTEX™ door has an increased leaf thickness of 68mm, giving it increased energy efficiency.
